PROFESSIONAL PROFILE

Production planning and industrial engineering professional with 7+ years of experience in apparel and leather goods manufacturing. Skilled in master production scheduling, capacity and materials planning, line balancing, efficiency analysis and cross-functional execution. Developed five Excel-based automation and Kaizen projects that reduced manual planning and reporting effort through practical, data-driven process improvement.

CORE EXPERTISE

Production Planning & Control (PPC) • Master Production Scheduling (MPS) • Capacity Planning • Material Planning • Line Loading • WIP Control • Plan vs. Actual Analysis • Industrial Engineering • SMV & Time Study • Lean Manufacturing • Advanced Excel • Process Automation • KPI & MIS Reporting

PROFESSIONAL EXPERIENCE

PICARD BANGLADESH LTD. | Senior Officer – Production Planning | May 2024–Present

- Prepare and manage daily, weekly and monthly production plans aligned with order priorities, capacity and shipment timelines.
- Analyze output, efficiency, manpower, WIP and planned-versus-actual results; report risks and support production recovery actions.
- Coordinate with Production, IE, PD, Quality and Store on cutting schedules, material availability, approvals and input readiness.
- Developed Excel planning and reporting automations to reduce manual updates and accelerate operational decision-making.

A PLUS GROUP | Industrial Engineer / IE Executive | Jul 2021–Apr 2024

- Conducted time and motion studies, SMV calculations, operation breakdowns and line-balancing analysis.
- Planned manpower allocation and work layouts; monitored daily efficiency, WIP, resource utilization and bottlenecks.
- Supported operator training and continuous improvement using Lean Manufacturing, 5S, QCO and Kaizen methods.

PRIDE GROUP | Junior Officer – Planning | Jan 2019–Jun 2021

- Prepared production plans, line loading summaries and shipment updates; monitored progress against schedule.
- Followed up materials and WIP across Cutting, Sewing, Finishing and Quality to escalate production delays.

SELECTED KAIZEN & AUTOMATION ACHIEVEMENTS

Monthly Production Planning Automation Reduced plan preparation from 1–2 working days to 15–30 minutes (~94–98% time reduction assuming 8-hour workdays).

Daily Cutting & FQA Pass Automation Reduced daily reporting from 20–30 minutes to approximately 1 minute (~95–97% time reduction).

Best & Poor Line Automation Bot Automated routine Industrial Engineering line-performance reporting.

Daily Efficiency Automation Bot Streamlined daily production efficiency report updates.

Workforce Automation Bot Streamlined manpower and workforce reporting.

For the three IE reporting bots: processing time reduced from 60 minutes to 10 minutes per report (83.3% reduction), assuming the stated time applies to each workflow.

EDUCATION

B.Sc. in Industrial & Production Engineering | Ahsanullah University of Science and Technology (AUST)

2014–2019 | CGPA: 2.82 / 4.00

HSC & SSC | Al Jameatul Falahia Kamil Madrasha, Feni | GPA: 5.00 / 5.00 (each)

TECHNICAL SKILLS & DEVELOPMENT

Advanced Microsoft Excel, production reporting automation, ERP/MIS, data analysis, KPI reporting, Microsoft Word & PowerPoint; SMV, time study, line balancing, 5S and QCO.

Professional learning: MS Office Course (2018), Industrial Safety Management Workshop, Supply Chain Overview Seminar.

ACADEMIC PROJECTS & LANGUAGES

Thesis: Roundness and Tapering of Drilled Holes Under Different Machining Conditions. Projects: Remote-Controlled Vacuum Cleaner; Ergonomic Adjustable Wrench.
